

Figure 1

More About Zooming

The History Controller maintains two sample frames to provide a zoomed-in view of the document. The first is the zoomed-in view of the document, and the second is the zoomed-in view of the zoomed-in view of the document.

The zooming controller can be applied to any view that has significant information to be zoomed in on. There are many possible candidates for zooming control. The History Controller maintains two sample frames for zooming control.

Many types of data have sample frames that would be appropriate to zoom in on. Text, tables, and other data can be zoomed in on. Text, tables, and other data can be zoomed in on. Text, tables, and other data can be zoomed in on.

Zooming out does not have to be a simple graphic reduction of the document. By using the zooming controller, a user can zoom in on a specific part of the document, and the zoomed-in view can be zoomed in on.
